

EDUCATION

American University of Sharjah

Expected May 2026

Bachelors of Science in Computer Science

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3, Java, C++

Frameworks: React, Astro, Next.js, Tailwind CSS, Spring Boot, Thymeleaf

Technologies: Visual Studio Code, Git/GitHub, Airtable API, Cloudinary

EXPERIENCE

Khayal

Sharjah, UAE

AI/ML Researcher - Arabic Imagined Speech EEG Decoding for Arabic Sentences

May 2025 - Present

- Developed an end-to-end EEG-based imagined speech decoding pipeline for Arabic sentence classification using Python, deep learning, and signal processing techniques.
- Built and evaluated deep learning models for EEG-based word prediction, using temporal EEG signals and band-power features to classify imagined Arabic words across sentence positions.
- Improved sentence-level decoding by designing structured Stage-2 methods, including bigram-based decoding and RAG-based LLM reranking over candidate Arabic sentences.

GC International FZCO

Dubai, UAE

Full Stack Developer Intern

June 2025 - Aug 2025

- Accomplished a 90+ Lighthouse performance score, as measured by Google's performance metrics, by optimizing Astro + React components, compressing media, and implementing caching strategies.
- Reduced resume-upload failure rate by over 80%, as measured by Cloudinary API logs, by implementing robust validation, retries, and size-checks for PDF uploads.
- Increased homepage engagement by 50%, as measured by user-interaction analytics, by integrating a 3D interactive valve animation using Three.js and GSAP.

AMZ Vintage Wholesale

Dubai, UAE

Freelance Web Developer

May 2025 - Aug 2025

- Improved page load times by 45%, as measured by Lighthouse and WebPageTest, by implementing Vite bundling, route-based code-splitting, and image optimization.
- Increased media engagement by 60%, as measured by click-through interactions, by building a dynamic image/video carousel with modal previews and lazy loading.
- Enhanced mobile responsiveness scores by redesigning layouts using Tailwind CSS and fluid grid systems.

Mashreq Bank

Dubai, UAE

Digital Engineering Intern (OCR & Automation)

July 2024 - Aug 2024

- Increased OCR extraction accuracy by 30%, as measured against ground-truth datasets, by integrating multi-engine OCR.
- Reduced manual data-entry time by 70%, as measured by internal process logs, by automating ID document parsing and text extraction workflows using Python.
- Improved text-cleaning accuracy by implementing noise filtering, image enhancement, and skew correction.

Certifications

IBM RAG and Agentic AI Professional Certificate - Coursera, Ongoing

Deep Learning A-Z [2026]: DL, AI in Python & AWS + LLM - Udemy, Completed
